

TOMORROW NEEDS *you.*

Apprentice BMS Project Manager

Job Summary

At Johnson Controls, we're on the hunt for enthusiastic individuals to join our dynamic Building Management Systems (BMS) team. You will play a key role in the wider team to deliver projects that optimise performance efficiency in our clients' buildings. By joining Johnson Controls you will be joining a leader in engineering and integrated solutions.

What You'll Do at Work

- **Specialize in Building Management Systems:** As part of the BMS team, you'll deliver projects for industrial, commercial, and residential markets, which exposes you to diverse projects and environments
- **Deliver projects from the beginning to the very end of its lifecycle.** Issue all documentation to the relevant parties and obtain approval from the Client or their representative
- **Consultation Focus:** Our team is primarily focused on consulting with clients to enhance their buildings, reduce running costs and emissions, and improve overall performance
- **Comprehensive Knowledge:** You'll gain a solid understanding of the main areas our systems interact with, including HVAC controls, Mechanical, Electrical, and Building Services Systems
- **Guidance and Mentorship:** Your mentor will guide you in fundamental BMS engineering principles, teaching you innovative methods to lower energy costs, reduce emissions, and improve building efficiency
- **Technical Role:** As an apprentice, you'll create detailed project plans and for various systems, ensuring compliance with industry and legislative standards
- **Diverse Project Environments:** Our team works on BMS systems in various environments such as warehouses, manufacturing plants, retail spaces, commercial offices, and schools. This exposure enhances your understanding of different BMS applications and challenges
- **Client Interaction and Site Visits:** You'll get the opportunity to visit client sites with colleagues to conduct surveys and gather information, aiding in the development of comprehensive projects tailored to specific client needs

Your Training Plan

Enrol in a Level 3 Project Controls Technician- level 3 delivered by Train'd Up alongside fellow Johnson Controls apprentices.

Engage in a day release basis training and receive on-the-job guidance from experienced mentors and engineers
